

Year 2 Spring 1 Newsletter

Scrumdiddlyumptious!

This half term we will be immersing the children in a world of chocolate, lickable wallpaper, super-size sweets and much more.

To kick off our topic we are having a chocolate experience in school. As part of the workshop children will be able to create their own chocolate and make lollipops as well as learn all about the origins of chocolate.

Thank you for returning forms and money for the workshop.

PE

Please ensure that your child comes to school dressed in their PE kit on PE days (Monday and Friday) and on days when they participate in an after school club e.g. gymnastics or football (school colours only).

Maths

Our topics for this half term are multiplication and division, statistics and geometry (shape). Some of these areas will be brand new learning for the children but we are sure they will love learning about them and challenging themselves.

English

We'll be designing and describing an edible room, creating recipes for marvellous medicine and making our own Roald Dahl inspired characters. The children have astounded us this far with their imaginations and this topic promises to be even more exciting!

Science

You may hear your child talking about wiggling worms, popping candy and expanding gummy bears! We are starting our topic with a day of sweetie science where the children will observe the weird and wonderful ways that sweets can behave! We're certain you'll hear lots about this half term's science work!

Art

We will be learning lots of new art skills this half term such as printing and sculpture. We will also be drawing in the style of Quentin Blake.

Dates

Chocolate workshop – Tuesday 8th
January
FOSPS disco 1st February
